STOP Laptop Theft with the new STOPLock™

STOPLock's Unique Dual Protection System STOPS Thieves Cold.

STOPLock's patented STOP Security Plate and Locking Cable system provides a double layer of proven protection. Highly visible security plate includes unique bar-coded ID and 24/7 toll-free recovery hotline number. If a thief tries to remove the plate, a chemically bonded "Stolen Property" tattoo imprinted with STOP's toll-free recovery hotline number is revealed, eliminating illicit resale value and facilitating recovery. STOPLock is a simple, inexpensive and effective solution for protecting laptops and other office equipment from theft and loss.

Thieves Won't Steal What They Can't Sell.

- STOPLock provides a highly visible external warning that the tagged equipment is police identifiable, stopping thieves by eliminating resale value.
- The patented STOPLock steel locking cable snaps into the specially designed STOP Security Plate, preventing snatch-and-run thefts.
- When the cable is removed for normal transport, the STOP Security Plate remains permanently affixed to equipment, providing STOP's around-the-clock protection.
- STOPLock facilitates quick and safe recovery of lost, stolen or misplaced laptops and other vulnerable equipment.

Permanent Tattoo Etched Under Plate
